

CSS Exercises for Profile Layout

HTML changes

1. Open **profile.html** in **profile** folder
2. Define class for profile image and remove width attribute
3. Enclose personal details into a `<div>`
4. Enclose about section into a `<div>`
5. Enclose skill section into a `<div>`

```

```

```
<div class="profile-info">  
  <h1 class="profile-name">Tommi Christensen</h1>  
  <h3 class="role">Freelance Full Stack Developer</h3>  
  <h5 class="location">Lucerne, Switzerland</h5>  
</div>
```

```
<div class="about">  
  <h2 class="section">About</h2>  
  <p class="detail">  
    Freelance Java Full Stack D  
  </p>  
</div>
```

```
<div class="skills">  
  <h2 class="section">Skills</h2>  
  <ul class="skill">  
    <li>Angular</li>  
    <li>Bootstrap</li>  
    <li>Spring Boot</li>  
  </ul>  
</div>
```

Style changes

1. Open **styles.css** in **profile/styles** folder
2. Remove margin above profile name (**.profile-name**)
3. Define styles for profile image (**.profile-image**)
4. Align profile info adjacent to image (**.profile-info**)
5. Remove margin around role (**.role**)
6. Apply margin for location (**.location**) with spacing in top and bottom
7. Clear float for section (**.section**)
8. Place about and skill sections adjacent to each other

`margin: 0`

```
float: left;
margin: 1rem;
width: 10%
```

```
float: left;
```

`margin: 0`

`margin: 0.5rem 0rem 1rem 0rem`

`clear: both`

```
.about {
  width: 50%;
  clear: left;
  float: left;
  padding-right: 2rem;
  border-right: 1px solid grey;
}

.skills {
  width: 20%;
  float: left;
  padding-left: 2rem
}
```
