

CSS Exercises for Font

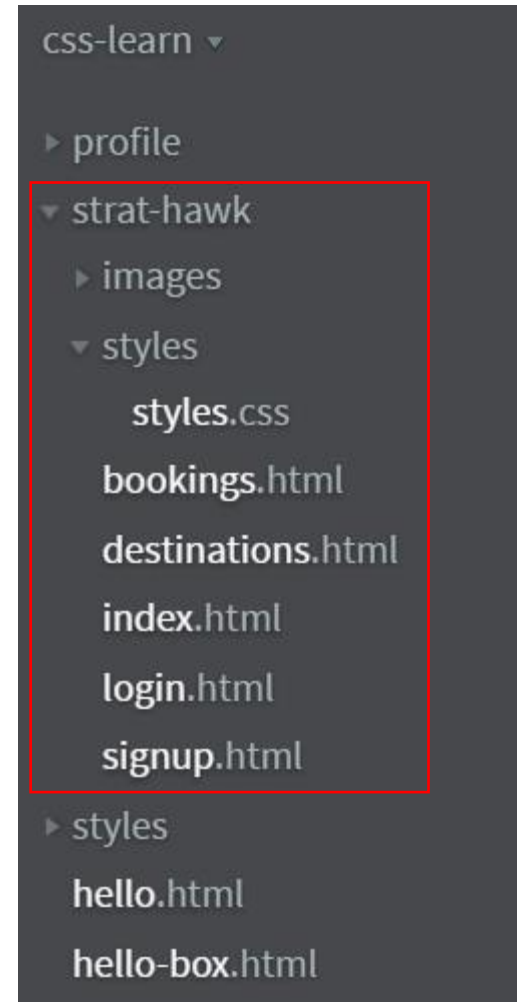

Strat Hawk - Font Change

The font 'Abel' has to be applied to all pages and for all elements of Strat Hawk web pages.

Files and Folder Creation

1. Copy 'strat-hawk' folder from 'html-learn' folder and place it under 'css-learn' folder
2. Create a folder named 'styles' in 'strat-hawk' folder
3. Create a file named 'styles.css' in 'styles' folder created in the previous step

HTML

Include link tag with 'styles/styles.css' in following HTML files:

- ❖ index.html
- ❖ bookings.html
- ❖ destinations.html
- ❖ login.html
- ❖ signup.html

CSS

1. Go to fonts.google.com and find font named 'Abel'
2. Copy and paste the @import of 'Abel' font into 'styles.css'
3. Apply font to body, input and select. Refer sample below for body, implement for input and select in similar fashion.

```
body {  
  font-family: Abel  
}
```

4. Check if font is applied in all pages and form elements
