CSS Exercises for Strat Hawk Navigation Bar

Style changes

```
margin: 0px
```

1. Open **styles.css** in **strat-hawk/styles** folder

2. Apply zero margin for body

```
width: 100%;
height: 5rem
```

3. Define height and width for navigation bar (**.nav**)

```
float: left;
margin: 1rem
```

4. Make logo (**.logo**) to float left and include a margin which helps to align in middle vertically

```
float: left;
margin: 1.5rem;
text-decoration: none;
```

5. Make navigation items (**.nav-item**) to float left, with margins to align in middle vertically and remove the underline

```
.nav-item:hover {
    color: #DAE1E7;
}
```

6. Define hover effect for navigation items

7. Define heading (**.heading**) with clear as both

```
clear: both
```
