CSS Exercises for Color

Navigation Bar changes

Implement following changes in

index.html:

1. Enclose h1 and anchor tag within a div and define the class name for this div as "nav".

2. Define "Strat Hawk" with class name "logo".

3. Define navigation link anchor tags with class name "nav-item".

4. Define class "heading" for Plan, Search Flights and Recommended Flights.

Current Code

```html
<h1>Strat Hawk</h1>
<a href="index.html">Home</a>
<a href="bookings.html">My Bookings</a>
<a href="destinations.html">Destinations</a>
<a href="login.html">Login</a>
<a href="signup.html">Signup</a>
```

Code after changes

```html
<div class="nav">
    <h1 class="logo">Strat Hawk</h1>
    <a class="nav-item" href="index.html">Home</a>
    <a class="nav-item" href="bookings.html">My Bookings</a>
    <a class="nav-item" href="destinations.html">Destinations</a>
    <a class="nav-item" href="login.html">Login</a>
    <a class="nav-item" href="signup.html">Signup</a>
</div>
```

Heading changes

In **index.html** define "heading" class for the following:

1. Plan

```
<h2 class="heading">Plan</h2>
```

2. Search Flights

```
<h2 class="heading">Search Flights</h2>
```

3. Recommended Flights

```
<h2 class="heading">Recommended Flights</h2>
```

Style changes

In **styles.css** define the following styles:

1. The navigation bar background color is #142850

2. The logo color is #DAE1E7

3. The navigation item color is #00909E;

4. Heading color is #00909E;

5. For navigation item make the font bold and increase the font-size to 1.25rem

```css
.nav {
    background-color: #142850;
    color: #00909E;
}

.logo {
    color: #DAE1E7
}

.nav-item {
    font-size: 1.25rem;
    font-weight: bold;
    color: #00909E;
}

.heading {
    color: #00909E;
}
```

Verify

Check if the output looks like this.

Implement Navigation Style in all pages

1. Copy and paste navigation bar changes from index.html to the following files:

   1. bookings.html

   2. destinations.html

   3. login.html

   4. signup.html

Current Code

```html
<h1>Strat Hawk</h1>
<a href="index.html">Home</a>
<a href="bookings.html">My Bookings</a>
<a href="destinations.html">Destinations</a>
<a href="login.html">Login</a>
<a href="signup.html">Signup</a>
```

Code after changes

```html
<div class="nav">
    <h1 class="logo">Strat Hawk</h1>
    <a class="nav-item" href="index.html">Home</a>
    <a class="nav-item" href="bookings.html">My Bookings</a>
    <a class="nav-item" href="destinations.html">Destinations</a>
    <a class="nav-item" href="login.html">Login</a>
    <a class="nav-item" href="signup.html">Signup</a>
</div>
```

Implement Heading Style in all pages

Apply class as "heading" in each file below:

1. bookings.html `<h2 class="heading">My Bookings</h2>`

2. destinations.html `<h2 class="heading">Destinations</h2>`

3. login.html `<h2 class="heading">Login</h2>`

4. signup.html `<h2 class="heading">Signup</h2>`
